

OPERATIONS TRANSPORTATION REPORT

March 2009

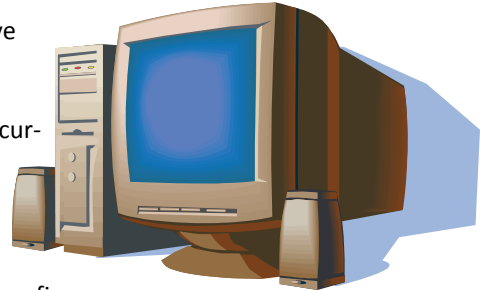

J. Hanlon, Secretary-Treasurer

Technology

Over Spring Break the IT Department was extremely busy. I have included a list of some of the projects they tackled.

BCSS:

- All computers, at BCSS were reimaged to fix some of the recurring problems, except the office computer and Macs.
- All monitors in the IT lab were replaced with 19" LCD screens. Those removed will be used for spares at BCSS and GFSS.
- Both downstairs and upstairs labs were restocked to their pre-fire count. There are 24 student computers in each lab.

GFSS:

- All classroom and staff computers have been replaced. This update was also due to the fire last summer.
- The library lab has been restored to its pre-fire count and we have replaced the aging and broken computers in the DLC.
- We installed the safety software in the CAD lab. This is a challenging project and we still have some bugs to work out.

Spring Break Projects

Some of the projects tackled during the March break were:

Hutton

- Hallway benches

CLES

- Painted the Family Centre

Board Office

- Gate for server room

Tech Centre

- Window covers installed

WBES

- Basement Storage
- Chlorinated the well

The schools are now using hydrogen peroxide as a disinfectant rather than bleach! A&G, the supplier, has provided some one-on-one training on the microfiber products.

We appreciate how hard the Maintenance and Custodial Teams work to keep our buildings running and our grounds in tip top shape.

Budget 2009/2010

- worked on the Budget for 2009/2010. Finance Committee will be meeting April 21, 2009.
