

OPERATIONS/TRANSPORTION REPORT April 2010

Safety Committee Training

Ken Emmons, Health and Safety Officer from School District No.23, provided training for School Safety Committees on April 16, 2010. It was a refresher course for some and a whole new adventure for first time participants.

Bus Driver Pro D

On April 23rd the bus drivers attended a session on pre-trips at the bus garage in Midway. Frank Marasco and two of his driver trainers provided theory and hands on pre-trip inspections to the drivers. It was an intense but very informative session.

Carbon Action Report

On April 30th the District submitted a Carbon Neutral Action Report for 2009. We had to report on current initiatives and also on our future initiatives. Thanks to Charlene for coordinating the school submissions with the District. The report will be published along with all other public sector organizations on the Climate Action website.

Finance Committee Meetings

Finance Committee Meetings in April were well attended by the public. I hope that people have gained a better insight into the District Finances.

Auditorium Lights

The new auditorium lights are up and working. This project was funded through the Community Connections Grant. I need to thank Kat Grootjes for taking the lead on the installation and Rick Evers for his hard work in helping with the installation. Kat as well as other community users have been trained on operating the lights.
