

SCHOOL DISTRICT No. 51 (BOUNDARY)

Operations/Transportation Report December 2008

HAPPY NEW YEAR!

Custodian Winter Break Cleanup

Once again our custodians did a great job during the winter break. Thanks to our custodians for all their hard work and dedication. The custodians really appreciated employees not accessing the building and also removing their shoes during the break. Thanks to school staff for their cooperation.

Maintenance

Winter came early this year and maintenance was kept busy keeping up with snow removal. During the month of December outstanding work orders, concert set-up and icicle removal has kept them running.

Technology

The IT department has installed the lab at Perley. There will be a few weeks of testing before deploying the last lab to West Boundary Elementary School. Also we have ordered some PC's that were destroyed in the fire, and the Lenovo's have arrived which we hope to have imaged and out by the end of February.

I have submitted to the adjuster and to the RCMP the cost of items already replaced and the approximate cost of the items we still need to replace. The total replacement costs are estimated at \$556,907.

It has also become evident that to ensure the security of our system and data we will need to upgrade our firewall.

Harassment Training - The teachers will be provided with harassment training on the following dates January 19, January 20 and April 29.
